Hoover Institution Press,U.S. Paperback. Book Condition: new. BRAND NEW, Understanding Communist China: Communist China Studies in the U.S.and the Republic of China, 1949-78, Ramon H. Myers, Kuo Tai-chun, In the 1960s and 1970s American private foundations and government agencies spent over \$40 million to support contemporary Chinese studies and train Americans to become experts on Communist China. How well did these programs, support facilities, and experts contribute to a better understanding of the complex events and changes that took place in the world's most populous country? Kuo and Myers survey and appraise that research by comparing it with the research facilities and experts in the Republic of China (Taiwan) where efforts were underway to understand the dynamics of change that occurred between 1949 and 1978, probably the most turbulent period in China's modern history. By referring to a small sample of learned journals and monographs, they develop a methodology for evaluating area research on Communist China. Their overall findings enable Kuo and Myers to discuss the strengths and weaknesses of American and Chinese research and proposed how the internationalization of research on communist countries like China could be greatly improved in the future.
