Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Technical Thermodynamics, Vol. 1: Fundamental Laws of Thermodynamics Theory of Gases The first edition of the present book appeared in 1859 under the title Grundzuge der mechanischen Warmetheorie (Main Features of the Mechanical Theory of Heat). This small publication of only twelve printers forms (signatures) had for its purpose a clear and connected presentation of the results of the scattered work of different authors which had appeared up to that time, and also of the outcome of my own investigations which dealt particularly with the behavior of vapors; another object was to direct the attention of mechanical engineers to the great importance which the new theory of heat might assume in the further development of the theory of machines. Under the same title there appeared in 1866 a revised and considerably enlarged second edition of the book; it was intended mainly for technical men, although the general theoretical portion was given more fully than was necessary, as an introduction to the study of the here pertinent technical problems. This edition was translated into French by Maurice Arnthal and Achille Cazin under, the title Theorie mecanique de la Chaleur, Paris, Gauthier-Villars, 1869; Hirn had already reproduced in translation the first edition of my book in a special section of his work, Exposition analytique et experimentale de la Theorie mecanique-de la Chaleur, Paris, 1862.
